PROJECTS AND EXPERIENCE

- **Bash Deadline Reminder** - <https://github.com/engi-neil/bash-deadline-reminder>
 - Authored a command-line utility using Bash scripting to enable users to efficiently add, remove, and list pending tasks or academic deadlines.
 - Designed the script to run automatically on terminal login, parsing a data file and displaying time-sensitive reminders to enhance personal organization.
 - Demonstrated strong proficiency in Bash, file I/O operations, and customizing Linux environments for improved productivity.
- **RAG-Based Scientific Research Assistant** - <https://github.com/immaNomad/ScientificResearch-Assistant>
 - Developed an AI-powered research assistant using Python, Streamlit, and LangChain to implement a Retrieval-Augmented Generation (RAG) pipeline.
 - Engineered a system that processes uploaded scientific papers (PDFs), extracts and chunks text, and stores vector embeddings for semantic search.
 - Deployed a user-friendly web interface with Streamlit, enabling users to ask natural language questions about the documents and receive AI-generated, context-aware answers.
